Palavi Early Intervention Centre (PEIC)
Reg. No. B 0063 (2018)
No. of Student 22

To enhance capacity and quality of Early Intervention Care for Early Intervention Center in Pen. Adding much needed component of professionals, therapy equipment & community base rehabilitation.

Early intervention Centre are special services for infants and toddlers at risk of developmental delays. These services are designed to identify and meet children's needs in five developmental areas. These are physical, cognitive, communication, social or emotional development, sensory and adaptive development. Early intervention includes provision of services to such children and their families for the purpose of lessening the effects of the condition. Early intervention can be remedial or preventive in nature remediating the existing developmental problems or preventing their occurrence.

If provided with early intervention care in the pre-schooling stage many of these children can be integrated in inclusive education environment and remaining in special schools. Besides it enables the children with development delays and severe disability to become independent in their activities of daily living by maintaining communication with their care givers. Therefore Early Intervention & Care is a critical requirement for every developmentally delayed child.

In the entire Raigad district there is only on Early Intervention Centre (EIC) at Panvel. The need of EIC is very high in these rural & tribal areas & therefore the only Centre of Panvel cannot fulfill feeds of 0 to 6 years of babies & children who are at-risk to disabilities.

Beneficiaries : All the at risk babies between the age range of 0 to 6 years need special services of rural & tribal areas of Raigad district.

Light House Special Teacher Training Centre (LHSTTC)
Reg. No. 17-569D.Ed.Spl Ed(MR)RCI/ 7339 (2011)
No. of Trainees 156

In Raigad district there was not a single Special Teacher Training Centre. Being rural & tribal area, there was no awareness regarding intellectual disability. To make people aware, to provide special services to these special children as per their special needs, to rehabilitate & to bring them in the mainstream of the society, special training centre was an important need & a serious requirement in these Rural & Tribal areas of Raigad. After 12th if anybody wants to do such courses, all the way they had to go to Mumbai for the same which was very costly & hectic, so people avoid to do such courses & also ignore this field, which was not proper. To know all these difficulties the institution started a Special teacher's training centre for D.Ed Special Education (Mental Retardation), which is recognized by Rehabilitation Council of India, New Delhi affiliated to 'Indira Gandhi National Open University'. It is the **"First" special teacher's training centre in entire Raigad district**, named as 'Light House' Special Teacher's Training Centre, where students from all over India can take admission. Since last three years RCI in collaboration with Yashwantrao Chavan Maharashtra Open University (YCMOU), Nasik started a **Distance B.Ed in Special Education (MR)** & out of 5 centres in Maharashtra they selected our centre. This year we are having our 4th batch of 50 students. Students from all over Maharashtra & other states have connected due to this course. 3291A is a centre code of our institution for distance B.Ed. Special (MR) course.

Various activities of LHSTTC :

- 1) To plan and implement public awareness projects
- 2) To prepare lesson plans
- 3) To perform demonstrations
- 4) To prepare Individual Education Program (IEP)
- 5) To organize various workshops and conferences
