EDUCATIONAL ACTIVITIES

Intellectual assessment

Intellectual assessment is a semi medical service that play important role of development and in education children with special needs.

Intellectual assessment play role to clear the picture of individual functional analysis and to make a educational road map to develop their abilities in simple way.

So hear educator will get actual idea to make (IEP) Individual educational plan. In our school we conduct intellectual assessment every year.

Parental counseling

Parental counseling involved engagement of parents in treatment / education as a part presentation of detailed information about the condition and its consequence and need of multidisciplinary education and treatment approach. With team of professionals such as psychologist speech therapist special educator and the parents as a primary care givers for dealing with issues are relating to the pressure and stress of parenting a child with special needs and developing an appropriate coping strategies to help the parents to manage the child. Development of the social support group to meet and share experiments with other par

Behavior modification

Behavior modification is an important part of therapy. Through this therapy individual addressing to specific target behavior on every day basis. Every day the session was continued for half an hour by a psychologist to decrease behavioral problem and improve abilities with different types of material. Initially the target behaviors and reinforcers were identified to continue the therapy program for the betterment of the child.

In our school we have 10 students with behavior problem & other associated condition.

Speech therapy-

To identify the child's strength and deficits in the area of communication parents were asked to send the child for a complete evaluation of speech and language. Based on the results therapist plan the therapy program to improve the communication skills. Speech therapy emphasizes improving spontaneous language and maximizing the child communication skill.

Medical check-up

Medical services play an important role of development and in education children with special need.

Psychiatrist, pediatric neurologist, nutritionist are very well known person or specialist in this field of mentally retarded child suffers various kind of associated condition, like seizure, Behavioural problem, mood problem, food problem so here these specialist can play important role to diagnose actual problem and will give prescription according to child problem.

In our school we conduct 1 camp per month and according to individual need in emergency.

Extra co-curricular activities

Mentally retarded children needs variety of activities so they can try to develop their overall personality.

Music therapy

Music therapy is very important supportive tool of education with mentally retarded children. through music therapy all sensory organs can be used to store sensory perception and can be later reached through sensory signals such as audio, visual, sense, taste perception.

We use music therapy 3 times in one week for 1 hour in school.

Play therapy

Play is a wonderful tool for helping children to share interaction play therapy can also allow youngsters to

explore their feelings, their environment and their relationship with parents siblings and peers.

Improving the Childs interaction with peer group and to improving child's play skills, play therapy was implemented. This was implemented in 3 stages

1. Building a rapport with the child
2. Parallel play
3. Turn talking

Every day or 3-4 times we took children on ground for 1 hour in a week our school.

Field work

Field work is a supportive and effective tool in education with special children. In this set up educator fixed one specific place for visit. Before visit he discuss the basic issue or point related to that place and later he visit to that place with children.

So the children get concrete picture of that place and how to deal with that place and they can apply that method in real life also. (E.g. trip, place visit).

For extra co- curricular activities we have other set-up also. That set-up include cultural, sports, diwali lamp making rakhis, making chalk, making flower pot etc.

These kind of activities can enhance can self confidence of individuals and these activities can give

support to set their carrier. so they will became self
reliant in their life.
