## Introduction

I take the honor and feel pleasure to place this annual report for year 2021 – 2022 of our organization is a voluntary organization registered under society registration act 1950, Bombay public trust act 1950.

This trust is a secular non-political, non-government, non- profitable registered charitable trust formed by professional qualified socially responsible men and women of the society.

The vision is the good of mankind irrespective of the caste, creed or religion for a just human society literary is social awareness, self-realization, and self-support, community health, hygiene and health education training with liberation and leadership relief and rehabilitation, empowering and encouraging the people.

Zilla Parishad, Latur and Siddhivinayak Foundation, Latur Operated Umang Institute of Autism and Multi Disability Research Center was established. The Umang Center was started with the aim of bridging the gap between children's integration preparation and regular school curriculum requirements.

This center, established in Latur city, provides relief and boost to the developmental growth of children through this center, specific types of therapy are made available to children under one roof. Here therapists/physicians and parents play an important role in the process of rehabilitation by supporting other parents by providing services based on their needs and presenting their issues effectively at the national and international level.

  
Secretary  
Siddhivinayak Pralasthan, Latur  
Tq. Dist. Latur-413512

## 2] Objective of the Siddhivinayak Prathisthan & Centre:

To create awareness in the society of self-absorbed and comprehensive developmental disorders and early detection of disabilities in children and provide them with all types of rehabilitation treatment under one roof at free and moderate cost and to make the district and other disabled persons who benefit from treatment self-reliant and competent in daily life and prepare for their integration and regular school curriculum. Bridging the gap between needs. This is the main purpose of the center.

## 3] Facilities available through Siddhivinayak Prathisthan & Centre:

- ❖ Child Neurology.
- ❖ Cerebral Palsy.
- ❖ Epilepsy.
- ❖ Migraine.
- ❖ Autism.
- ❖ Attention instability and hyperactivity disorder.
- ❖ Mental Retardation.
- ❖ Unconscious urination in sleep (Bed Painting).

### Child Intervention:

- ✓ Cognitive Impermeant.
- ✓ Lack Of Social Interaction.
- ✓ Expression Less.
- ✓ Difficulty in Communication.
- ✓ Grasping Difficulty.
- ✓ Crawling Difficulty.
- ✓ Standing Difficulty.

### Child Occupational Therapy:

- ✓ Autism
- ✓ Attention Defecate Disorder.
- ✓ Development Delay.
- ✓ Cerebral Palsy.
- ✓ Learning Disability.
- ✓ Down Syndrome.
- ✓ Muscular Dystrophy.
- ✓ Attention instability and hyperactivity disorder.
- ✓ Intellectual Disability.

### **Child Physiotherapy:**

- ✓ Cerebral Palsy.
- ✓ Paralysis.
- ✓ Polio Myelitis.
- ✓ Development Delay.
- ✓ Ataxia.
- ✓ Spinal Cord Injury.
- ✓ Muscular Dystrophy.
- ✓ Torticollis.

### **Child Speech Therapy:**

- ✓ Speech Delay.
- ✓ Stuttering.
- ✓ Speech Cluttering.
- ✓ Miss Articulation.
- ✓ Fluency of Speech.
- ✓ Slow Speech.

### **Behavioral Therapy:**

- ✓ Obsessive Compulsive Disorder.
- ✓ Stress Disorder.

- ✓ Depression.
- ✓ Social Phobia.
- ✓ Personality Disorder.
- ✓ Nervous.
- ✓ Autism.
- ✓ Eating Disorder.

### **Child Psychology:**

- ✓ I Q Testing.
- ✓ D Q Testing.
- ✓ Development Screening Test.
- ✓ Disability Assessment.

### **Remedial Therapy:**

- ✓ Learning Disability.
- ✓ Slow Learning.
- ✓ Development Disturbance.

### **Hydro Therapy:**

- ✓ Pain Reduction.
- ✓ Resistive Exercises.
- ✓ Muscle Stiffness and Joint Stiffness.
- ✓ Balance Issue.
- ✓ Co-ordination Issue.

### 4.3] Child Occupational Therapy:

- Instructional planning and research are important features of occupational therapy.
- Occupational therapists study the anatomy and psychology of children to diagnose illnesses and devise treatments to overcome or improve them.
- Neuro developmental therapy, Rudd's therapy, Brainstorm approach as well as specific valid therapeutic methods for relaxation are used in therapy.
- Valid scales are used for assessment.
- A child's sensory problems are determined by giving (Sensory Profile) and specific methods are used to address them.
- Sensory problems include reduced response in touch, hearing, body awareness, smell, taste, coordination etc.
- ADHD Helps children focus and stabilize.
- By developing not only professional skills but also the ability to understand the patient's concerns, occupational therapists play an important role in bringing autistic children out of their world and introducing them to the world around them.
- Occupational therapists collaboratively provide assistive technology and splints to help children become independent and assist with activities of daily living.

24	Shailesh Madhav Kamble	Cerebral Palsy	03-12-2021	2021-22

#### 4.5] Speech Therapy:

- The therapy that fills the life of many children with words, teaching them to speak is Speech Therapy.
- Many children are in the problem of 'Ears Deaf but not Speak' which means they cannot speak because they cannot hear. Some stutter, some stumble while speaking, some speak very slowly, some speak very loudly, some mumble while speaking, and some cannot speak due to mental shock. Speech therapy plays an important role in helping to restore children's self-confidence due to all these.
- By finding the essence of all these problems, speech therapists provide information on how to improve the quality of children's voice, how to make certain sounds, how to take care when speaking certain languages, how to pronounce.
- To diagnose speech disorders like stuttering, misarticulation, cluttering, etc., speech therapists often use tools based on speaking, asking various questions, and various tests.
- Teaching sign language, lip reading to those who cannot speak at all is done through speech therapy.

### Beneficiary Activity done in Year 2021 – 2022 Details

## 5] Group Therapy:

Group therapy is a form of psychotherapy that involves one or more therapists working with several people at the same time. This type of therapy is widely available at a variety of locations including private therapeutic practices, hospitals, mental health clinics, and community centers.

Group therapy is sometimes used alone, but it is also commonly integrated into a comprehensive treatment plan that also includes individual therapy.

### 5.1] Group Therapy Can Help With:

Group therapy is used to treat a wide variety of conditions, including:

- Attention-deficit/hyperactivity disorder (ADHD).
- Depression.
- Eating disorders.
- Generalized anxiety disorder.
- Panic disorder.
- Phobias.
- Post-traumatic stress disorder (PTSD).
- Substance use disorder.

In addition to mental health conditions, CBT-based group therapy has been found to help people cope with:

- Anger management.
- Chronic pain.
- Chronic illness.

- Chronic stress.
- Domestic violence.
- Grief and loss.
- Weight management.

After analyzing self-reports from people who have been involved in the process,

- ❖ **Altruism:** Group members can share their strengths and help others in the group, which can boost self-esteem and confidence.
- ❖ **Catharsis:** Sharing feelings and experiences with a group of people can help relieve pain, guilt, or stress.

## 5.2] Benefits of Group Therapy:

There are several advantages of group therapy:

### A] Support, Safety and Encouragement:

Group therapy allows people to receive the support and encouragement of the other members of the group. People participating in the group can see that others are going through *the same thing*, which can help them feel less alone. The setting allows people to practice behaviors and actions within the safety and security of the group.

### B] Role Modeling:

Group members can serve as role models for other members of the group. By observing someone successfully coping with a problem, other members of the group can see that there is hope for recovery. As each person progresses, they can, in turn, serve as a role model and support figure for others. This can help foster feelings of success and accomplishment.

### C] Insight on Social Skills:

By working with a group, the therapist can see first-hand how each person responds to other people and behaves in social situations. Using this information, the therapist can provide valuable feedback to each client.

### D] Affordability:

Group therapy is often very affordable. Instead of focusing on just one client at a time, the therapist can devote their time to a much larger group of people, which reduces the cost for participants.

## 7] Sensory Park:

Sports is an integral and traditional subject of the country. Everyone tries out new ideas through sports during their childhood but now a days kids sports are neglected due to busy schedule of man. Parents are happy as the child is mobile and living the life within four walls and does not bother us. Due to its prevalence, children are falling victim to various mental diseases. Accordingly, a sensory park has been set up under Zilla Parishad, Latur and Siddhivinayak Prathisthan, Latur. The park has been developed on the concept of naturally stimulating the seven senses namely touch, aroma, perception, sound, taste, vestibular and pre-proception. Specific equipment is used in this.

**7.1] Purpose:** To improve the sensory level of children and provide them with sensory devices in one place to stimulate their senses independently and incidentally.

**7.2] Methods:** Sensory Parks actively try to improve children's diseases by using different colored pictures, flowers, attractive and purposeful toys, tracks, slides, swings, stones, wood, sand, gravel paths. Therefore, the sensory park is doing valuable work for the children not only for play but also for intellectual and developmental growth.

**Social Work, Free Camp, Celebrate  
Autism Day's, Guest Visit**

### 01] Donate Free Medicine, Wheel Chair to Disable, Autism Patient's:

Siddhivinayak Prathisthan Latur is always helpful for needful people. I'm Pediatric Neurologist my first preference is how to recover patient immediately & get quick relief. Any time I'm think that my disable, autism or any disease patient how will get neat to recover or how to normal life live.

patient requires certain medical equipment for everyday life. Not just the physically impaired people, but also those that have certain mental conditions may need the help offered by professional medical equipment. Thus, many disabled persons and their families struggle in their absence, as life can be difficult without such support.

Now, this kind of equipment is available in medical facilities, but a person can't spend his or her entire life in such facilities unless we are talking about extremely severe cases.

So, most disabled people are living at home, trying to manage their condition in the best way possible.

This disability can be overcome with aids such as wheelchairs, walking sticks, handrails. This equipment helps the elderly or the handicapped to hold on very easily and manage to move from place to place independently.

In addition, beds can be found that allows the person to move from side to side in order to prevent pressure sores. There are many devices that provide solutions for situations such as stairs and ramps that allow carrying a person in a wheelchair or stair climber that has a seat and carries the person up or down the stairs.

Aren't there any laws or services that can help the disabled get the medical equipment they need for free or, at least, at much lower prices? The good news is

that there are ways to get medical equipment for the disabled, either at more accessible prices or entirely free.

Of course, the medical equipment, in this case, is not brand new, but getting any kind of medical equipment that can make life more comfortable is better than not getting any equipment at all.

## 02] Celebrate World Autism Awareness Day:

Zilla Parishad Latur and Siddhivinayak Prathisthan Latur jointly organized World Autism Awareness Day on 02.04.2021 at Umang Institute of Autism and Multidisability Research Center, Latur.

### **12] Celebrate World Cerebral Palsy Awareness Day:**

Zilla Parishad Latur and Siddhivinayak Prathisthan Latur jointly organized World Cerebral Palsy Awareness Day on 06.10.2021 at Umang Institute of Autism and Multidisability Research Center, Latur.

### **13] Celebrate Dyslexia Day:**

Zilla Parishad Latur and Siddhivinayak Prathisthan Latur jointly organized World Dyslexia Day on 08.10.2021 at Umang Institute of Autism and Multidisability Research Center, Latur.

Dyslexia Week is an annual event to raise awareness of dyslexia. Every year we produce resources and share information with teachers, employers and the general public to highlight a different dyslexia-related theme.

Dyslexia Week 2021 was run 03 October - 09 October. In the past we have looked at issues such as early identification, reasonable adjustments, and raising awareness and understanding of dyslexia.

Dyslexia Week is often supported by schools and businesses and it helps to bring media attention to the issues that dyslexic people face on a daily basis.
