## A message from our Managing Secretary

This has been a very successful year for Manovikas Family. Our organization has expanded significantly over the last twelve months and we have made a number of particularly notable achievements. Major projects that we recently embarked on are progressing very satisfactorily. And many new opportunities are opening up for us. We face a very exciting future.

Manovikas is now a complex organization with multiple components: of Advocacy, Education and care, which received prestigious status of NGO Membership from UNESCO.

We are looking forward especially to the growth of Manovikas Consulting because this opens up new opportunities for persons with disabilities to act as an umbrella organisation for independent experts working in the field of reconciliation – to come together, to share their experiences and knowledge, and to support each other.

Around the India, empowered persons with disabilities are achieving visible progress. We know the power of positive role modelling; how vital it is for disabled persons growing up to see the success of their non-disabled peer group, and through education, experience and example, for it to come within their grasp.

Together with our many partners and stakeholders in every part of the India, Manovikas Family will continue to deliver the premise and promise of the 2030 Agenda and its global goals, seeking equality for all.
