INTRODUCTION

M. B. Barvalia Foundation is a registered public charitable trust established in 2018 with the objective of promoting holistic health and value based education. It has following units:

- HOLISTIC CHILD CARE CENTRE AND SPECIAL SCHOOL
- SPANDAN HOLISTIC MOTHER AND CHILD CARE HOSPITAL
- SPANDAN HOLISTIC INSTITUTE OF APPLIED HOMOEOPATHY
- OUTREACH PROGRAMME

We are working in the most neglected area in health care viz. disability and mental health. We are catering to people from the low socio – economic class. Through our services, we have helped thousands of disabled children and have been able to restore smiles in number of distressed parents.

1.Holistic Child Care Centre And Special School:

A unique centre where in a multidisciplinary team works through a holistic approach.

We run Govt. recognized special school registration No. A-1088

We are also accredited to National trust No. 060219251230049 /MR- CP- AUTISM-MD

It conducts following activities:

Since last 19 years Holistic Child care Centre has been serving the needs of the children with disability and mental health problems through a multidisciplinary team. Thousands of children have benefited through various projects undertaken. We have catered to all types of disability. Based on our sound conceptual framework SPANDAN-SYMPHONY, we have expanded our clinical, educational, research and outreach activities & projects.

We continued to receive patients from all over India as well as abroad. We continued to provide Homoeopathic services. We started number of specialized services in child care through modern Psycho educational tests for learning disability, personality evaluation, early intervention etc.

We consider each child is unique. We work on the principle of understanding each child's psychology and learning the mechanism of best unleashing their latent potential. In our organization approaches always integrated taking into account body, mind and soul. Our team experiments with teaching methods and techniques used all over the world to suit them to our need. Thus, we can develop the intelligence and thinking capacities of our children. Our students come from all strata of society, including the poorest and most disabled children of society.

Based on the disability and the capabilities of the children that come across during the Educational Evaluation of the child by our team of professionals, the children are divided into different batches: **Sunflower, Rose,**

Lilly, Tulip or Lotus. We are training our children for Pratham Open School exams. Pratham is the largest NGO working toward quality education for all. In order to help the children appear for the class X exams, they conduct level A (Class 3), level B (Class 4 and 5) and level C (Class 6 and 7) as a strong foundation.

Other than academics, we teach our students pre-vocational skills in order to enable them to be independent, useful members of society.

A very systematic, pre-decided and well defined procedure is followed. It initiated the following process, reconstructing the child's profile. Appropriate targets are set and some of them are expected to be realized within a stipulated time.

Parents of special children are among those who face a major challenge. They need to deal with the child's needs and the family's needs. In this process, they may be unable to provide optimum care to their children. As a result, they may feel frustrated, guilty or helpless. Parents need to realize that these feelings are natural, and they also need to learn how to tackle the challenges presented to them

Statistics:

Total No. of Students in Special School	: 45
New admission	: 06
Drop out	: 00

SPANDAN HOLISTIC INSTITUTE OF APPLIED HOMOEOPATHY

Spandan Institute has been working through holistic multidisciplinary approach in the field of child care. Quality research is an integral component of the functioning of the institute. Cases are treated exclusively by Homoeopathy, but through standard protocol and evaluated through competent experts like clinical psychologist, neurologist, special educators etc.

SPANDAN focuses on application of vibrant & holistic Homoeopathy in its clinical services. This enables the Institute to provide strong forum for advance learning. We impart basic as well as advanced Homoeopathic training and education to interns, Homoeopathic graduates and post graduates. Entire focus is on applied aspect of Homoeopathic practice where training, education and research are carried out through holistic multidisciplinary approach. Multidisciplinary aspect helps to carry out through evaluation in a most scientific way

Research Based Projects:

[I] HOMOEOPATHIC CLINICAL RESEARCH:

A): "Effectiveness Of Homeopathic Treatment In Sensory Processing Disorders In Autism, ADHD And Learning Disability"

Investigators: Dr. Praful Barvalia, Dr Nrupen Bhutkar

Abstract:

Sensory Processing Disorder is a condition in which the sensory signals received by the central nervous system do not become organized into an appropriate response. This happens in Autism, ADHD And Learning Disability. Presentation is based on the clinical experiences acquired at Spandan Holistic Multidisciplinary Institute, Mumbai where 234 cases of these disorders were treated with Homoeopathy. Cases were studied through care giver's sensory profile 2, in autistic children with CARS, ATEC and AHS. In autistic children, Sensory index per ATEC recorded 43% change; while compared to six months prior to treatment and the start of treatment the mean change was around 9%. Six months before treatment ATEC was around 70.67 and went up to 73.68. Then our treatment started. After 12 months of homeopathic intervention, it came down to 55.47 and after 18 months 46.41. Thus mean change in ATEC is 27.27 while changes in sensory components was 43%. Homeopathic medicines have profound impact on sensory issues and bring about its correction-fast. For Homoeopathic anamnesis, totality of the cases was perceived by taking into account sensory pattern, kinetic state, regressive state, features pertaining to affects and mood and qualified aspects. SPD is a multi-factorial phenomenon, wherein psychological, psychodynamic factors, mother's state during pregnancy as well as

suppression and vaccination can contribute to the emergence as well as maintenance of the disorder. Reduction of autistic, adhd and LD features and rehabilitation in mainstream society of the child can be achieved through classical homeopathic approach

Keywords: sensory pattern, kinetic state, Regression, multi-factorial, Totality, Sensory-Processing-Disorder, Autism, Homoeopathic-approach

PRESENTATION: KEY NOTE SPEAKER-Dr Praful Barvalia, preparation support, Dr Nrupen Bhutkar

1st Malaysian International Integrative Healthcare Conference (MIIHC) 2017 -'Integrated Management of Children with Special Needs,

CYBERJAYA UNIVERSITY COLLEGE of MEDICAL SCIENCES (CUCMS), MALAYSIA.

B): Evaluation Of Effectiveness Of Homoeopathy And Occupational Therapy In Sensory Processing Problems Of Children Suffering From Attention Deficit Hyperactivity Disorder”

Investigators: Dr Nrupen Bhutkar, Dr. Praful Barvalia,

OBJECTIVES

1. To explore the effectiveness of Homoeopathic intervention with Occupational Therapy in Sensory Processing Problems of children suffering from ADHD and compare it with effect of Occupational Therapy as observed through reduction in corresponding Scores
2. Observe overall effect in symptoms of ADHD after Homoeopathic intervention when there is reduction in symptoms of Sensory Processing problems with respective scales i.e. Conner's for ADHD and Sensory Processing Profile for SPP.
3. To perceive the various causes responsible for ADHD and Sensory Processing Problems and to know its miasmatic background by detail Clinical evaluation and History taking
4. To perceive the state of susceptibility in Sensory Processing Problems.
5. To study group of remedies coming up in the treatment of Sensory Processing Problems of children suffering from ADHD.

STUDY IS GOING ON

LEVEL: DOCTORATE/Ph.D.

C): Holistic Psycho-educational Intervention in children with uncivilized behavior in mainstream municipal school.

Investigators: Dr Rahul Suryavanshi, Dr Bishnu, Dr Praful Barvalia and Dr Pournima Thakkar

Aim:- To study the criminal propensity among the children and adolescent in slum area manage them through “ Holistic Psycho-educational approach”

Children from Municipal schools were evaluated with the help of well designed questionnaire and those found positive were taken up for the study. We found 101 students out of total 466 students of urban slum schools showing great propensity towards conduct issues and criminal behavior. They were further evaluated by psychometry and interview and 62 cases were taken up. Cases were being studied by Homoeopathic physicians and psychologists and prescribed Homoeopathy.
