FORE WORD

History is evident in depriving the persons with disabilities, their rights, opportunities and spaced them in the society. In the past the treatment of PwDs in the society varies from culture to culture of the countries and even within the country from region to region. Education is a powerful force for creating an inclusive society and awareness is a critical aspect for creating demand which in turn gives birth to the service facilities in the community. Awareness in a systematic manner will create enabling and empowering conditions for the P.W.Ds to be part of the inclusive society. Traditional attitudes and beliefs often become obstacles in the development process of the disability empowerment and rehabilitation.

Regret to say after the promulgated ACT 1995 and the modified new RPwD Act 2016 even after 25(Twenty Five) years there exist a wide disparity at three principal levels with respect to differently abled persons. There are accessibility, affordability and entitlement claim in terms of education, public resources and employment opportunities. Besides, cardinal feature of safe and dignified quality of life remains non negotiable underlying like public goods. Much has been written and spoken about political lethargy and weak executive actions in promoting equal opportunity ecosystem for the differently abled persons. The Objectives of the RPDw Act 2016 the rehabilitation of the PWDs still executing in a miniature scale. So without strong direction neither project gathers sufficient momentum to success. Unless efforts are backed up by the legal frame work people will not take the issues seriously in order to ensure that negative attitudes are rooted out from the society. In such crisis of time corporate action i.e. public and private sector are basically needed to implement different activities. Corporate Social responsibility basically needed, falling which laws remain within the red tape of file.

In spite of many obstacles, organization systematically continuing different programmes with the assistance of ministry of social justice & Empowerment Govt. of India and SSEPD Dept. Govt. of Odisha in different district of the state Odisha. It has been continuing social mobilization, capacity building, Skill development training, physiotherapy services for senior citizens and therapeutically services including action oriented activities both in institutional and outreach setup for the comprehensive rehabilitation of intellectual disabilities as well as all category of PWDs (Divyangjans) as per RPwD Act 2016 for their inclusion in the society.

This is the welcome sign that inspires optimism and optimism in an accelerating element for the forth coming session 2020-21 are not different and despair. The dawning new hope which has set its eyes on new and higher goals of achievements will also bring new horizon of change for P.W.Ds.

Thanking you.

 B. Parida
 Chief-functionary

CREDO

CRSR stands for the betterment of the society in general and the disadvantaged ones in particular. It believes that the community participation and involvement in development process and co-operations at all the stages are the pillars of understanding between CRSR and community. CRSR believes in participation of the community, which can be self reliant and sustainable.

BELIEF

Organization believes the wide range of potentials of down trodden and persons with disabilities (PwDs) as disadvantaged who given an opportunity are also be capable for taking care of themselves. These old cultural shibboleths are only now being broken with the emergence of the view that disability is a human resource issue is a developmental issue. The marginalized class of people also be given scope and opportunity from planning to sustainability of developmental programmes. There is also a growing realization that disability is also being a human right issue. The poor people now realized to enjoy the rights of their entitlements in the community.

STRATEGY

CRSR has been continuing the strategy of its focus area, keeping in view as charity replaced by development and human rights. The twin prospective to view poverty is evidence by re-christening ministry of welfare as the ministry of social justice & Empowerment, Govt. of India. In the process of activities the voice of assets less persons and the differently abled, dominated as part & parcel of the programmes.
